

Civil Engineering (2014-2015)

Below is the advised sequencing of courses for this degree,
the official degree requirements are found in the University General Catalog.

This plan assumes that you start in the Fall Semester. Notice that 300 and 400 level courses are only offered once a year.

See 5-year plan for information when courses are offered.

TOTAL UNITS FOR DEGREE = 128

| |
|---|
| #MATH 122A/B is a 5 unit version of MATH 125. Students taking MATH 122 should consider delaying the Tier 1 INDV course to maintain a reasonable academic load. |
| *INDV and TRAD courses must meet University general education requirements. One course must be recognized by the University as focusing on non-western culture, race, gender or ethnicity. TRAD 101 satisfies this requirement and is highly recommended as one of the two TIER 1 (TRAD) courses required. For a civil engineering major, take any Economics class that meets the required TIER 2 (INDV). |
| ** Engr. Science Elective - ENGR 211P (Eng Economics) and ENGR 211I (Dynamics). |
| *** To meet the CE Tech. Elective requirement, students must select 4 courses from the list of acceptable technical electives. A minimum of one of the four technical electives must be taken from the list of design-oriented technical electives. Prerequisites for these courses are available on the Electronic Catalog. |
| ****To meet the CE Lab requirement, students must complete each of the following laboratory courses: CE 329 (Hydraulics), CE 349 (Soils), CE 389 (Engineering Materials). Co-requisites are as follows: CE 329 (CE 218); CE 349 (CE 343); CE 389 (None). |
